Watch for our introduction of "MRS. G. G. McLAURIN"

This Camellia is a seedling of the well-known "DONCKELARII". It has all of the good qualities and possibly none of the faults of the parent.

It has better growth habits, is NOT susceptible to die back as is the parent, the blooms stay on longer and do not shatter. It is equally as COLD HARDY as the parent. Since it has first bloomed it has never yet failed to produce a profusion of good blooms, outside, every year!

This camellia has been observed carefully for SEVEN YEARS!

The blooms are from large to very large, a bright soft RED, to a very brilliant red, from loose semi-double to irregular peony, with a flare of bright yellow stamen, it blooms from mid-season to late, and it has the sheen of the parent.

We do not claim this camellia to be the most sensational introduction in years, but we do KNOW that it has staying qualities, and we predict that it will be here, blooming in your garden, when many of the recent introductions are no longer around!

AND WHY NOT? It has ample size, depth, color, quality, form, beauty, it is cold-hardy and a profuse bloomer outside, and DEPENDABLE !

Available in the fall of 1964

Developed by G. G. McLaurin, Dillon, S. C.

No scions or rooted cuttings sold on patented plants.

We try to list our plants according to our supply, as to grouping.

Throughout the season we are continually replenishing our stock! The sizes listed herein are exactly what we had on hand at the time this plant list was compiled. BECAUSE WE DO NOT HAVE IT LISTED, IT DOESN'T MEAN THAT WE DON'T HAVE IT--Contact us for your needs.

THANK YOU!

WE APPRECIATE YOUR PATRONAGE!

Our plants are State inspected and certified-- We ship anywhere!
